

Vises

Dual Force Precision Mechanical Booster Machine Vises

- 1 LARGER OPENINGS:** Unique jaw design increases clamping capabilities and options
- 2 DUAL FORCE ANTI-LIFT MECHANISM:** Produces all directional alignment combined with ½ pound fo downward force for every pound of horizontal force
- 3 UNIQUE CHIP COVER DESIGN:** Advanced design protects the Spindle and nut while facilitating the evacuation of chips.
- 4 ADJUSTABLE CLAMPING FORCE REGULATION SYSTEM:** Precise clamping force regulation for simple, easy optimum clamping pressure all the time
- 5 MECHANICAL BOOSTER:** Delivers a consistent clamping force – resisting shocks and vibrations created under high machining pressure
- 6 MULTIPLE VISES:** Precise, easy alignment in multiples with guaranteed accuracy
