

WHY PROTALK?

Durability

Meets or exceeds military standards: MIL-STD 810 C, D, E, F & G, including "driven rain" and IP54/55 dust and water intrusion

Perfect for demanding work settings and any weather: Unique sealed case and metal diecast chassis

Optimum radio integrity: Belt clip integrated into the chassis

Removeable antennas: Rapid swap-out to different models

Commercial grade radios: Built to the highest KENWOOD quality standards

Sophisticated Features

Wireless cloning is standard: Fast and easy cloning other Kenwood ProTalk radios within range

Light weight, high capacity batteries: Last up to 18 hours, charge in only 3 hours

Compatible with comparable BRS and LMR radios: Easy integration

Extend range with repeaters and talk to other higher tier digital radios: ProTalk expands your capabilities

On the go USB charging: Never be without a charged radio

Choice

Select the right radio now: Based on the coverage and features you need

Compact PKT-23: Weighs less than a deck of cards and smaller than a credit card

Affordable digital NX-240V/340U: Extend your coverage

Intrinsically safe TK-2360IS/TK3360SKU16P: Use where combustible materials are present

Industry leading 2 or 3 year warranties: We back up ProTalk quality

FEATURES

Cost-Effective

Stop wasting money on cell phones: ProTalk radios are so affordable you can outfit your entire staff with a fast and easy way to communicate

Simple to use: No downtime for training on complicated multi-use devices

Time to step up to digital: Expand your coverage with digital, now made affordable with ProTalk

Simple to Use

Open the box, start talking: Ready to use, right out of the box

Comes with what you need: Antenna, battery, fast charger, belt clip and owner's manual included

Pre-programmed channels: Set up your new communications system in minutes

Wireless cloning: Fast and easy on-the-go cloning with other BRS radios you're already using

Select your coverage

Pick your coverage: There is a ProTalk radio for every terrain and any working conditions

Full 1.5 watts means no compromise in coverage: Reach up to 5 miles or 12 floors

5 watt versions: Powerful reach up to 7 miles

VHF for outdoor use: Talk up to 7 miles or coverage a 300,000 square foot work area

Battery Life

Up to 22 hours of use per battery charge: High capacity Li-Ion batteries

Fast charging time, only 2.5-3 hours: Switch out radios quickly

Batteries that match your work shifts: 12 hours or more, ProTalk delivers

Power Management: Convenient USB charging

KENWOOD Audio

Over 90 years of audio excellence: KENWOOD engineers brought their high fidelity transmission expertise to ProTalk

Noise cancelling technology for high noise: Sophisticated background noise suppression technology means you are always heard

Voices are heard clearly the first time: Employees don't need to repeat themselves

Privacy

Privacy Lock Scrambler: Additional security for every call

Digital ProTalk radios assure voice security: Others cannot listen in like they can with analog radios

39 QT privacy codes and 168 digital privacy codes: Separate user talk groups on shared frequencies for greater privacy
